

Repair & Upgrade Your Solar Assets

Our Borrego O&M technical team does more than routine preventive and corrective maintenance. They also perform root cause analysis and more complex repair and upgrade projects.

Inspections

(e.g. occurring at end of construction, end of warranty, before buying and selling, or during underperformance)

Root-cause analysis of underperformance

(analysis will include performance modeling, equipment failure analysis, ROI analysis, and IE styled report)

Repair & upgrade of aging equipment

(e.g. repowering inverters or modules, repairing aging racking and infrastructure, etc.)

Repair of damage

(e.g. repowering of modules because of material defect, damage because of weather, etc.)

PV removal & reinstallation

For new roof & roof repairs

WHY CHOOSE BORREGO O&M

- The special projects' scope, that is beyond routine preventive and corrective maintenance, is managed and performed by technical experts — technicians, engineers, and technical project managers.
- When required, we provide full design and permitting capabilities in-house.
- Our team has an owners mindset, making recommendations with your financial goals and the long-term value of the asset in mind.
- As with our entire Borrego O&M team, we provide these services with proactive communication, transparency, and accountability.

CUSTOMER TESTIMONIALS

"We've worked with Borrego's O&M team both in special projects and normal day-to-day operations. We have found Borrego to be responsive and competitive when measured against their peers."

*EJ Martin, VP Operations & Maintenance,
Longroad Energy*

"We've worked with Borrego's O&M Special Projects team on a few occasions and have found them to have good communication and schedule adherence and a quality work product."

*Katelyn Edgar, Asset Manager
TortoiseEcofin*
